- 3. Instructions
- Avoid eyes or skin exposure to direct or scattered radiation;
- ESD protection is required for transportation, storage and operation; short-circuit protection between pins is required for transportation and storage.
- Please connect pins by solder when operating current is over 6A; solder point should be close to the root of pins with a max soldering temperature at 260°C and a duration less than 10 seconds;
- Drive constant current power supply by laser and avoid surge while working;
- Operate under rated current and rated power;
- Good heat dissipation is required;
- Please test with coated fiber in order to avoid chip damage by reducing back reflection;
- Seal the optical fiber output connector; otherwise, the optical fiber may fail due to thermal adsorption and contamination.
- Water temperature set  $23\pm3^{\circ}$ C, cooling water flow > 13 L/min; Cooling water pipe diameter is 12mm.
- Operating temperature is 20°C~30°C;
- Storage temperature is  $-30^{\circ}\text{C}^{-}+70^{\circ}\text{C}$ .
